Abdulkadir Shaikh

Backend Developer | Full-Stack Engineer

Navsari, Gujarat | +91 7434043381 | contact@abdulkadir.in

Portfolio | GitHub | LinkedIn

Education

Uka Tarsadia University **2024 – 2028**

Bachelor of Technology in Computer Science and Engineering CGPA: **8.5/10**

Technical Skills

Programming Languages: JavaScript, Python, C++, Dart, SQL

Backend Development: Node.js, Express.js, FastAPI, Drogon, REST API Design

Frontend & Mobile: React, Vue.js, Flutter

Databases & ORM: PostgreSQL, MongoDB, SQLite, Prisma ORM, Mongoose

Tools & Platforms: Git, GitHub, Docker, Linux, Postman

Engineering Concepts: Authentication & Authorization, Database Design, Object-Oriented Programming, Data Structures & Algorithms, Software Testing (Jest)

Experience

Backend Lead (Freelance) **May 2026 – Aug 2026**

MESMS — Multi-Tenant Retail ERP/POS Platform

- Architected a multi-tenant ERP/POS backend across 21 modules and 48+ PostgreSQL tables.
- Built 123 REST APIs using Node.js, Express.js, and Prisma, including an 11-step atomic billing transaction.
- Led 4 developers, defining API contracts, authentication workflows, and database standards.

Software Developer (Client Project)

Cross-Platform Productivity App

- Built and launched a cross-platform productivity app reaching 1,000+ organic users.
- Implemented offline-first storage and daily synchronization using Flutter and Hive.

Full-Stack Developer Intern **Dec 2025 – Apr 2026**

Bloomr.world — IIT Madras-Incubated Startup | MERN Stack

- Delivered 2 product modules using MongoDB, Express.js, React, and Node.js; contributed to 20+ branches with a 75% first-review approval rate.
- Redesigned 5+ core interfaces, including the homepage, user profiles, and booking flow.

Selected Projects

PULSE GitHub

FastAPI, Flutter, Vue.js, YOLOv8, OpenCV, WebSockets

- Developed an AI-powered emergency traffic platform spanning 2 mobile apps and 3 web portals for ambulance and control-center coordination.
- Integrated YOLOv8 and OpenCV for real-time vehicle detection and traffic-density analysis to support intelligent signal prioritization.

Emotion Expressor GitHub

C++20, GTK4/gtkmm, CMake, D-Bus, XDG Desktop Portal

- Built a native GNOME/Wayland emoji picker in C++20, loading 1,870 emojis in approximately 15 ms with ranked search latency below 500 µs.
- Engineered a persistent, event-driven daemon with 0.0% measured idle CPU usage, D-Bus activation, and global shortcuts via XDG Desktop Portal.

Folder-Scaffold npm | GitHub

Node.js, JavaScript, CLI

- Published a zero-dependency Node.js CLI for automated AI-agent skill installation, surpassing peak 270 weekly npm installs.
- Designed an extensible plugin architecture supporting technology-specific skills for Flutter, FastAPI, and Node.js.

Leadership & Achievements

- **Webmaster, ACM AMTICS Student Chapter**: Maintain the chapter website and manage technical event infrastructure.
- Finalist, ACM AITR Indore; Finalist, Odoo x VIT Pune; Finalist, Odoo Hackathon 2026.
- Winner, College Shark Tank Competition; Runner-up, College Ideathon Competition, Universtiy Presenation Competition.
