

ALFISHA ANSARI

Frontend Developer | React & Responsive Web Development

ansarialfisha2006@gmail.com | +91 79901-20715 | Vyara, Gujarat | [LinkedIn](#) | [GitHub](#)

PROFILE

CS undergraduate (9.73 CGPA) building production-style, responsive interfaces with React and Figma-to-code workflows; shipped a full-stack ordering platform integrating React with Supabase and RESTful data flows. Currently deepening skills in Next.js and Tailwind CSS.

TECHNICAL SKILLS

- **Web Development:** React, JavaScript, HTML, CSS, responsive web development, API integration, Git/GitHub
- **Currently Learning:** Next.js, Tailwind CSS
- **Programming:** Python, Java, PHP, C
- **Databases:** MySQL, Supabase
- **Design & UI/UX:** Figma, Canva, Wireframing, Design Thinking, Design Systems
- **Tools:** VS Code, Apache NetBeans, Vite
- **Soft Skills:** Leadership, Adaptability, Communication, Creativity, Problem Solving

EXPERIENCE

UI/UX Designer & Frontend Developer (Intern)

SmaranAI.in

Remote, India | Dec 2025 – Mar 2026

- Improved onboarding completion for a multi-role Internship Management System by designing and prototyping responsive workflows in Figma for Intern, HR, and Supervisor users, reducing navigation steps across three user roles.
- Increased usability of attendance and reporting modules by building intuitive interface layouts and reusable UI components, cutting the clicks needed to complete common tasks.
- Streamlined certificate management and assessment tracking by translating Figma designs into structured, developer-ready interface specs, enabling faster handoff to the engineering team.

PROJECTS

Online Bakery Website | Personal Project, 2–3 months

- Built a fully responsive e-commerce ordering site from scratch using React and Supabase, integrating a live backend to handle real-time order and inventory data.
- Delivered a mobile-first, cross-device UI by applying responsive design principles across product listing, cart, and checkout flows.
- Managed the full development lifecycle using Git for version control, from initial wireframes through deployment-ready build.

Event Finder Website (PHP Project)

- Developed a CRUD-based web application enabling users to discover local events, integrating server-side logic to handle event creation, filtering, and updates.
- Reduced manual data handling by building a structured MySQL-backed system for event storage and retrieval.

EDUCATION

B.Tech in Computer Science and Engineering

UKA Tarsadia University | CGPA: 9.73 / 10 | 2024 – Present

EXTRA CURRICULAR

- Active in campus tech and cultural events (NSS Volunteer; led decoration team for college-wide events).
